Laboratory Innovations

“Unidentified samples and illegible labelling pose a multitude of problems and issues within the laboratory environment...”

B-403 WATER DISSOLVABLE LABELS

Dissolves completely after 30 seconds exposure to warm water without damaging the surface or leaving any residue
Reduces the labour required to remove labels, reduces maintenance to filters and drains and enables easy re-identification of reusable items

B-492 PCR TUBE LABELS

Instead of labelling every PCR tube separately, up to 8 PCR tubes can now be identified simultaneously.

Resistant to common Lab chemicals and will remain legible throughout processing to enable reliable sample traceability

B-7425-AC STERILISATION INDICATING LABELS

Get a clear visual indication of successful sterilisation
Label changes colour and displays a 'sterilized' message after 10 minutes in autoclave conditions at 121°C

BradyJet J2000 COLOUR LABEL PRINTER

The more samples laboratories need to process, the more time consuming it becomes to retrieve specific sample
Sort samples by colour

Print reliable labels & stay productive
